

Leonardo has more than 15 years of experience in Software Development, System Analysis, and Project Management. In 2019, Leonardo got a Post-Grad Degree at Humber College in Software Development and currently is working as a Full Stack JS Developer and System Analyst.

Due to the previous professional experiences acquired, Leonardo has a complete domain of all Software Development Life Cycle. From requirements gathering, design, and development to testing, deployment, and post-sales support. Moreover, Leonardo is a Java 8 Certified Developer and has Academic experience with PHP/Laravel as well as professional experience working with Nodejs and React.

Leonardo also worked in a wide range of IT projects for different sectors and industries in Brazil like Qualicorp Group, RHI Magnesita, Public Ministry of Maranhão State, University of Campinas, Unimed-BH, Usiminas, Belo Horizonte City Hall, and VIA 040.

Some recent and relevant achievements:

- Post-Grad Alumni from Humber College Information Technology Solutions Program with 91.73 overall GPA.
- Developed and delivered a React/Nodejs application for a Toronto based Company to manage Construction Projects. The project was conceived and delivered in less than 3 months, from scratch.
- Research, designed, developed and trained more than 40 people to apply and make use of a maintenance plan to perform preventive and corrective maintenance in more than 3000 IT assets spread over 936km of the highway.

Last but not least, Leonardo also directly managed and oriented multi-disciplinary teams in dozens of projects.
